

# *LightFlo 8x4*

## **NEW DRY HIRE SERVICE**

**We are pleased to announce the introduction of a dry hire service which will enable rental houses to sub hire Lightflos from Anytronics to supplement their own stocks in times of high demand.**

We will supply fully tested fixtures with safety coated daylight or tungsten tubes and no logos, other than the standard 'Anytronics' branding on the control panel.

The yokes will be finished in dark navy blue for easy identification.

Rates will be in line with those of the rental houses who stock Lightflos and will be available on a daily or weekly basis, with discounts dependent on quantity and duration of hire.

Initially we aim to have 200 units available for hire, which will be available for collection from Liphook, Hampshire.
